 Boiler Tube Cleaning – Brickwork & Refractory – Boiler Valve Maintenance  
 Pipework – Complete Boiler Installation & Removal

Please reply to: Advanced Boiler Services Ltd; Little Orchard, Stockhill Road, Chilcompton, Somerset BA3 4JQ

**Press Release**

**Top Safety Accreditation for Advanced Boiler Services Ltd**

Local business **Advanced Boiler Services Ltd** has been awarded accreditation from Safecontractor for its commitment to achieving excellence in health and safety.

Safecontractor is a leading third-party accreditation scheme which recognises very high standards in health and safety management amongst UK contractors.

**Advanced Boiler Services Ltd** is principally involved in the Industrial Steam & Hot Water Boiler sector, specialising in the preparation of boilers for annual insurance inspections, 5 yearly SBG 1/2 NDT examinations and supply & installation of steam boilers

The company's application for Safecontractor accreditation was driven by the need for a uniform

Safecontractor accreditation will enhance the company's ability to attract new contracts and its commitment to safety will be viewed positively by its insurers when the company liability policy is up for renewal.

Safecontractor is applicable to most sectors although it is particularly relevant to food manufacture, property, facilities management, retail, and leisure sectors, all of which are big users of contracted services.

John Kinge, technical director of Safecontractor said, "Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place."

"More companies need to understand the importance of adopting good risk management in the way that **Advanced Boiler Services Ltd** has done. The firm's high standard has set an example which hopefully will be followed by other companies within the sector.

Safecontractor plays a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process.”

Under the Safecontractor scheme, businesses undergo a vetting process which examines health and safety procedures and their track record for safe practice. Those companies meeting the high standard are included on a database, which is accessible to registered users only via a website.

Client-organisations who sign up to the scheme can access the database, enabling them to vet potential contractors before they even set foot on site. These clients agree that, as users of the scheme, they will engage only those who have received accreditation.

Over 210 major, nation-wide businesses, from several key sectors, have signed up to use the scheme when selecting contractors for services such as building, cleaning, maintenance, refurbishment, or electrical and mechanical work.
